

Senior Data Consultant

OVERVIEW

Excelion Partners' Data Science & Analytics practice is looking for a Senior Data Consultant to join our team. You will work directly with clients and peers to design and deliver cutting-edge data solutions. If you have a desire to grow your career in data and to be involved with innovative analytics solutions across a variety of challenging projects and industries, this may be just the position for you.

As a member of Excelion's Data Science and Analytics practice, the Senior Data Strategist will lead a number of Excelion client engagements while being accountable for managing daily working relationships with clients to ensure satisfaction. You will actively participate in data analysis and collaborate with data engineers and data scientists to satisfy engagement requirements with an eye on long term client goals.

This role requires a combination of data analytics, client management, and strategic problem-solving strengths. This is a consultative role. It will require someone with an understanding of the principles and techniques of data analysis that can also consult clients on their data.

Some of the day to day tasks:

- Meeting with clients to understand their data and business needs.
- Analyzing client data (cleaning, prepping, modeling and visualizing).
- Collaborating with client and internal data people.
- Presenting progress and results to client stakeholders.

QUALIFICATIONS

- 3+ years experience analyzing data as a data analyst or statistician
- A mind that is curious about and enjoys exploring data
- Proven ability to present progress and findings to stakeholders
- Knowledge and ability to run Agile project management methodologies
- A track record of strong collaboration skills when building data solutions.

POSITION ATTRactions

- You will get exposure to new data technologies and analysis techniques.
- Projects will allow you to enhance your data science skills or project management skills.
- Position is critical to organization's long-term success and supported as such.
- Fully Remote
- Excellent work/life balance

PREFERRED DATA & TOOLS EXPERIENCE

- Dataiku
- PowerBI
- Statistical skills
- Or other data analytics tooling (Alteryx, Tableau, Looker and etc.)

GEOGRAPHICAL PREFERENCES

- Remote (US Only)
